Professional Experience

Expys — *Los Angeles, CA*
Founding Engineer — *2025 - Present*

- Architected and shipped three products as a 2-person engineering team: an Admin Dashboard (Next.js), Admin Mobile App (React Native), and customer-facing Marketplace App (React Native)
- Engineered cross-platform notification system with full Android, iOS, and Web Push support for public and internal alerts
- Built LLM-powered tools to auto-generate product offerings and extract insights from customer conversations
- Designed interactive map interface to visualize and manage global events in real time
- Deployed self-hosted GitHub Actions runners, cutting CI/CD infrastructure costs by $500–$1000/month

React | React Native | NodeJS | PostgreSQL | LangChain | Local/Cloud LLM | Sentry | Grafana | Docker | Github Actions | Figma

True Homes — *Charlotte, NC*
Platform Engineer 2 — *2023 - 2025*

- Designed a strangler-fig migration pattern to incrementally modernize a legacy Web Forms application to Blazor
- Led company-wide migration from TFS to Git and built a custom CLI tool to manage multi-repo workflows
- Developed an automated document builder, eliminating manual document creation across the organization
- Reduced page load time for a high-traffic internal tool by 86%, saving employees 50+ hours per year
- Optimized PDF generation and aggregation pipeline, cutting build times by 58%

.NET Core/Framework | Blazor | MS SQL | Azure DevOps CI/CD

Driven Deliveries — *Los Angeles, CA*
Software Engineer / Senior Software Engineer — *2021 - 2023*

- Built real-time driver tracking system monitoring 100+ drivers daily across Southern, Central, and Northern California
- Architected a cloud-based media library for centralized multimedia sharing across the organization
- Led development of a dynamic routing engine using vehicle routing algorithms with safe, transactional override capabilities

Typescript | NodeJS | React | React Native | MongoDB | Github Actions | AWS CI/CD

Fidelity Investments — *Raleigh, NC*
Junior Software Engineer — *2020 - 2021*

- Selected for LEAP program: a competitive 6-month full-stack development program for high-potential CS graduates
- Developed and maintained secure investment APIs serving high-net-worth executive accounts

.NET Core/Framework | Java | Angular | Oracle SQL | Azure DevOps CI/CD

Education

Clemson University — *Clemson, SC*
Bachelor of Science in Computer Science — *2015 - 2019*

- Major Focus: Distributed and Cloud Computing

Projects & Associations

Brother 2 Brother
Co-Founder

- Co-founded Clemson University's chapter of the Student African-American Brotherhood (SAAB), an organization dedicated to ensuring men of color excel academically, socially, and professionally
- Board member responsible for planning and executing events, managing finances, and organizing campus outreach

Skills

Languages	Typescript/Javascript | C# | SQL | Python | HTML/CSS (Tailwind, SASS)
