# Isaac **McQueen**

imcquee | 1-843-368-1526 | imcqueendev@gmail.com | isaacmcqueen.com

## Education

**Clemson University** — *Clemson, SC*
Bachelors of Science in Computer Science — *2015 - 2019*

- Major Focus: Distributed and Cloud Computing

Software Engineering | Functional Programming | Data Structures and Algorithms | Database Systems | Operating Systems | Networking | Computer Architecture

## Professional Experience

**Expys** — *Los Angeles, CA*
Founding Engineer — *2025 - Present*

- 2 person engineering team that built out an internal Admin Dashboard (NextJS), internal Admin Mobile App (React Native), and customer facing Marketplace App (React Native)
- Developed public and internal alert system, including full support for Android/IOS/Web Push Notifications
- Created simple but effective AI tools to generate product offerings and analyze customer conversations
- Built interactive map to display and manage global events
- Deployed physical Github Actions runners to manage CI/CD pipelines, saving $500 - $1000 per month in cloud costs

React | React Native | NodeJS | PostgreSQL | LangChain | Local/Cloud LLM | Sentry | Grafana | Docker | Github Actions | Figma

**True Homes** — *Charlotte, NC*
Platform Engineer 2 — *2023 - Present*

- Designed a strangler-fig migration pattern to upgrade a large web forms project to modern Blazor
- Facilitated a migration from TFS to Git, including the creation of a Git tool to manage multiple repositories across the company
- Introduced a new document builder tool, eliminating the need for manual document creation
- Reduced the page load time for a high-traffic tool by 86%, saving relevant employees 50+ hours per year
- Optimized the pdf build and aggregation process, reducing generation times by 58%

.NET Core/Framework | Blazor | MS SQL | Azure DevOps CI/CD

**Driven Deliveries** — *Los Angeles, CA*
Software Engineer/ Senior Software Engineer — *2021 - 2023*

- Implemented a driver tracking system monitoring 100+ drivers daily in Southern, Central, and Northern California
- Created a cloud based media library to share multimedia content across the company
- Led development for a dynamic routing system that leverages vehicle routing algorithms with safe and transactional overrides

Typescript | NodeJS | React | React Native | MongoDB | Github Actions | AWS CI/CD

**Fidelity Investments** — *Raleigh, NC*
Junior Software Engineer — *2020 - 2021*

- LEAP program graduate: a 6-month full-stack development program for high-potential CS graduates
- Maintained and developed sensitive customer investment APIs for high value executives

.NET Core/Framework | Java | Angular | Oracle SQL | Azure DevOps CI/CD

## Projects & Associations

**Brother 2 Brother**
Co-Founder

- Clemson University's chapter of the Student African-American Brotherhood (SAAB)
- SAAB is an inclusive organization dedicated to ensuring men of color have the support needed to excel academically, socially, and professionally
- Board member responsible for planning and executing events, managing finances, and organizing campus outreach

## Skills

**Languages** Typescript/Javascript | C# | SQL | Python | HTML/CSS (Tailwind, SASS)

**Tech Stack** React/React Native | Node | .NET (Core/Blazor) | MongoDB | Redis

**Tooling & CI/CD** Docker | Nix | Github Actions | AWS CI/CD | Azure DevOps Pipelines
